Figures	3
Tables	4
Preface	5
Introduction	7
Chapter 1: Biology of the Oyster	9
Chapter 2: Taphonomic Processes	13
Physical Degradation	13
Chemical Alteration	14
Conchiolin Degradation	14
Calcium Carbonate Reaction	15
Paramorphic Substitution	15
Acid Dissolution	16
Recrystallization Following Calcination	17
General Preservation Techniques	17
Salt Removal	18
Hardening Valves	18
Chapter 3: Sampling	21
Excavation	21
Adequate Sample Size	21
Chapter 4: Habitats Being Harvested	25
Morphometric Analysis of Shell Shape	25
Height-Length Ratio	25
Index of Ecomorphism	27
Epibiont Analysis	29
Chapter 5: Intensity of Harvesting	39
Chapter 6: Oystering Methods	41
Harvesting Techniques	41
Preparation Techniques	43
Chapter 7: Sclerochronology	47
Growth Lines in Bivalves	47
Analysis of Shell Microgrowth Patterns	51
Staining Methods for Microgrowth Analysis	53
Acetate Peel Methods for Microgrowth Analysis	57
Growth Rates	59
Marker Years	59
Analysis of Shell Microgrowth Patterns: (Reprise)	60
Chapter 8: Demographic Analyses	61
Walford Plots	61
Cumulative Frequency Plots	63
References	70
Appendix I: Useful Solutions	74
Silver Nitrate Solution	74
Hardening Solution	74
Etching Solutions	74
Staining Solutions	74
Mayer's Acid Hematoxylin	74
Eosin	74
Destaining Solution	74
Acetate Peel Solution	74
Appendix II: A Simple Proportional Ruler for Estimating Season of Harvest	76
